A powerful prescription for healthier productivity

Designing the latest medical devices presents a unique challenge. Selecting the right cable and wire solutions is paramount to ensure that your products continue to earn a reputation for quality, reliability, and performance. Alpha Wire helps companies boost productivity, increase reliability, and achieve new levels of capabilities.

Get it now!
Forget long lead times. Our products are in stock for same-day shipping. With small minimum orders, you get what you need and you get it fast. With more than 1500 distributor locations worldwide, Alpha delivers the industry’s widest range and largest inventory of wire, cable, and tubing products.

Supra-Shield® for unsurpassed EMI performance
Medical diagnostic and treatment equipment needs exceptional resistance to EMI. Spurious signals can cause a misdiagnosis or a faulty reading. Alpha cables are available in several shielding options—including our industry-leading Supra-Shield foil/braid for exceptional performance across a wide frequency range. Noise won’t be a problem.

Applications
- CT scanners
- MRI machines
- Dialysis and blood centrifuge machines
- Adjustable hospital beds
- EEG and EKG devices
- Medical robots

Alpha Wire offers a broad range of cables for medical device applications

**A full range of solutions**

**Xtra-Guard® 1 cable**
A high-performance workhorse cable featuring tough PVC insulation and jackets, Xtra-Guard 1 cable offers stranded conductors for flexibility and a choice of shielding options. It’s ideal for control, monitoring, light-duty power, and just about any other application. Xtra-Guard cable is available in a variety of jacket colors, including white.

**Xtra-Guard Flex cable**
Flex cables offer long-lasting flexible designs to provide excellent performance in high-flex, high torsion, and continuous-flex applications, such as motion control and robotics.

**FIT® heat-shrink tubing**
FIT tubing, available in a wide range of materials and shrink ratios for reliably protecting, sealing, and adding strain relief, provides excellent physical characteristics such as low longitudinal shrinkage and wide temperature ranges.

**EcoWire™ hook-up wire**
The 100% recyclable alternative to PVC-insulated wire, EcoWire offers 45% smaller diameter, 40% lighter weight, superior abrasion resistance, and ten times the toughness.

EcoWire is the latest addition to our full line of hook-up wire to meet your needs for wide temperature extremes, ability to withstand wear and abrasion, electrical performance, or resistance to oil, solvents, and chemicals.
The cables you trust. The service you deserve.

Every application is critical and wire failure is not an option when the safety of equipment and patients is paramount. Specify Alpha cable for precise medical applications, since the integrity of your system is only as robust as the products you use.

Custom cable is standard

Alpha Wire goes one step further: manufacturing custom cables to meet unique applications—offering specific conductor counts, shielding options, jacket materials, and versatile product designs. Our custom cable orders are often shipped in less than a week, once again giving you products with more convenience and less delay.

Service and support, second-to-none

Selecting the correct cable for your critical application is essential to overall system reliability, performance, and safety. So we make it easy for you to select the right Alpha cable for your specific application. Our online resources include a wire and cable selection guide, technical information, full product catalog, and a distributor locator to make it easy to select and get the cable you need.

Can’t find what you’re looking for? Design the cable to your specification. It’s easy, just visit www.alphawire.com!
